

Dear Customer,

a member of the MAPEI Cement Additives Division will visit your premises in the near future. As Health, Safety and Environmental (HSE) issues are, just like for you, Mapei's highest priority, we would like to make sure we are prepared at best for our visit.

Our staff is trained and prepared to face any HSE issue in each of the following situations:

Visit to your offices

Normally, during office meetings simplified HSE regulations apply.

Potential Risk:

Cement Plant visit

Our staff is equipped and used to employ industrial grade Personal Protective Equipment (PPE). On a standard basis our staff will use:

- Helmet
- High Visibility Clothing
- Safety Shoes
- Ear- and eye Protection

Potential Risk:

Industrial Trial

Our staff is specifically trained and used to employ industrial grade Personal Protective Equipment (PPE). On a standard basis our staff will use:

- Helmet
- High Visibility Clothing
- Safety Shoes
- Ear Protection
- Eye Protection
- Dust Mask
- Gloves

Potential Risk

Mill Inspection / Mill Audit

Our staff is specifically trained and used to work in confined spaces and use related industrial grade Personal Protective Equipment (PPE).

In case of these particular activities, there are specific safety procedures in place (including detailed and plant-specific risk assessments), based on which the exact measures/equipment will be determined.

Potential Risk

Before our visit, kindly provide additional indications on the following issues:

- Are there any particular / additional / new HSE procedures or PPE indications related to your premises?
- Is there any particular / additional / new HSE induction training requested?
- In case any particular PPE requirements apply (for example: helmet colour), will you ensure the availability of this equipment during our visit?

We are looking forward to our visit and a mutually safe and healthy collaboration.

With Best Regards,

Davide Padovani, Global Director Cement Additives Division
